

2021 National Survey of Children's Health (NSCH)

Guide to Topics & Questions Asked

The National Survey of Children's Health (NSCH) is funded and directed by the U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau (HRSA MCHB), and is administered by the U.S. Census Bureau. Between June 2021 and January 2022, participants were mailed an invitation to complete an online household screener followed by a child-level questionnaire using a secure and confidential website. Additionally, participants were provided the opportunity to complete a mailed, paper version of the household screener and questionnaire instead of the web-based materials. See the NSCH Methodology Report and Sampling and Administration Diagram for more information. Below is a guide to the questions asked on the household screener and the child-level topical questionnaires. As in previous editions of the surveys, some variables in the public use file may be recoded to ensure consistency and ease of use. These recoded variables will appear in the public use file but will not appear in the table below.

KEY:

- ^ Denotes that survey item is new to the 2021 NSCH (vs. 2020 NSCH). New items are noted in purple font.
- * Denotes that item content has substantively changed in the 2021 NSCH (vs. 2020 NSCH) or data are not comparable with the 2020 NSCH due to changes in question wording or response options; these are noted in red font. See box below for more information on the criteria used for content changes.
- ^a Denotes that response option for the survey item has changed in the 2021 NSCH (vs. 2020 NSCH).
- Indicates a list of questions under one question stem.
- { } Complex skip patterns are explained in brackets.
- x No number was assigned to this survey question. This question is nested within another survey item.
- Question does not exist in this version of the survey.
 No symbol: Indented questions represent question sequences and are used if the respondent answered "yes" or gave a response other than "no" or "0" to the primary, non-indented question.

Reasons for changes to content in 2021 NSCH

- 1. To be consistent with other Federal policy/programs
- 2. To reflect an updated understanding of a topic/question
- 3. To focus on updated Maternal and Child Health Bureau priorities
- 4. To reflect emerging priorities as identified by stakeholders

Note:

Pre-Survey Screener (Completed prior to full survey):

The screener is administered in advance of the full survey. It begins by asking an adult in the household if there are any children 0-17 years old in the home, how many children there are (TOTKIDS_R), what primary language is spoken (HHLANGUAGE), and if the house, apartment, or mobile home is owned with or without a mortgage or loan, rented, or occupied without rent (TENURE). The # sign following each question number indicates which child in the household the response is referencing when there is more than one child in the household.

The following questions are then asked about each of the four youngest children living in the home:

- 2. How old is this child? (C# AGE YEARS)
- 3. What is this child's sex? (C# SEX)
- 4. Is this child of Hispanic, Latino, or Spanish origin? (C# HISPANIC R)
- 5. What is this child's race? [Mark one or more boxes] (C# RACE R)
- 6. How well does this child speak English? [only asked of children 4+ years old] (C#_ENGLISH)
- 7. Does this child CURRENTLY need or use medicine prescribed by a doctor, other than vitamins? (C#_K2Q10, C#_K2Q11, C#_K2Q12)
- 8. Does this child need or use more medical care, mental health, or educational services than is usual for most children of the same age (C# K2Q13, C# K2Q14, C# K2Q15)
- 9. Is this child limited or prevented in any way in their ability to do the things most children of the same age can do? (C#_K2Q16, C#_K2Q17, C#_K2Q18)
- 10. Does this child need or get special therapy, such as physical, occupational, or speech therapy? (C#_K2Q19, C#_K2Q20, C#_K2Q21)
- 11. Does this child have any kind of emotional, developmental, or behavioral problem for which they need treatment or counseling? (C#_K2Q22, C#_K2Q23)

If YES to any of items 7-10, two follow-up questions are asked:

- Is this because of ANY medical, behavioral, or other health condition?
- Is this a condition that has lasted or is expected to last 12 months or longer?

If YES to 11, one follow-up question is asked:

 Has their emotional, developmental, or behavioral problem lasted or is it expected to last 12 months or longer?

Respondents are also asked to provide basic information (age and sex) about up to six additional children in the household. These data are used for statistical purposes only and are not released.

Once information on all children is gathered via the screener, one child from the household is randomly selected. The remaining questions of the survey pertain only to this randomly selected child.
